

Instructor: Doug Custis

School District: Spearfish

Lesson Plan: Handheld Computers for Organization

Subject Area: Biology II

Grade Level: 11 and 12

1. What do I want my students to learn?

How the handheld can help them with organization through the date book and the address book. Learn to use the Documents To Go software.

2. What standards will be met?

Primarily those standards associated with technology and technology integration.

3. What is my goal?

Incorporate handheld computers in the Biology II curriculum and in the students' daily life.

4. How will I assess the learning that took place?

Check for the ability to perform each of the necessary functions.

5. How will I know when the desired learning has taken place?

When the students are able to carry out the assigned tasks and then beam the results to me.

6. How will the lesson be taught?

Whole class: Assign handhelds, demonstrate the use, teach them the different applications, and use hands-on. Some individual work (self-discovery) will be used.

7. What material and/or equipment including software will be necessary?

Handhelds and the included software.
